Experience

Production Assistant - The Sembrich

May 2023 to September 2023

- Pioneered their recording studio; researching and purchasing audio and video equipment suitable for professional recording within a strict budget of \$10,000.
- Executed venue preparations for Summer festival series, overseeing lighting and sound engineering.
- Mixed and edited audio and video recordings of series concerts for Museum archive

Intern - Manhattan Beach Recording Studio

January 2023 to May 2023

- On-the-go mixing and editing while tracking artists to provide seamless edits without restricting the artist from recording straight-through.
- Extensive knowledge of Pro Tools - including many industry standard plugins, extensive knowledge of outboard gear and studio signal flow.
- Setting up studios before sessions, including testing and arranging microphone placement, testing and patching outboard gear, and preparing the control room and recording room for the engineer.

Code Coach - theCoderSchool

January 2023 to May 2023

- Teaching Python and Scratch to grade-school students with varying levels of programming experience.
- Introducing students to important programming concepts such as object-oriented programming, debugging, and code optimization.
- Providing one-on-one support and guidance to students who needed extra help or want to explore more advanced features of Scratch and Python.

Podcast Producer - The Center for Research on Vermont

January 2022 to May 2022

- Recorded live interviews and edited audio for podcasts.
- Constructed intro, outro, and background music for the MudSzn podcast show.
- Published podcasts onto the MudSzn and Local Wire podcast shows.
